

AMENDMENT TO THE ABSTRACT:

Please amend the Abstract to read as follows:

~~An~~ A method for making an electronic circuit arrangement comprises providing a substrate having an electrical conductor thereon, wherein the electrical conductor includes two contacts spaced apart substantially a predetermined distance; providing an electronic jumper having two contacts spaced apart substantially the predetermined distance; ~~distance and respectively connected to the two contacts of the~~ substrate; and mounting an electronic device on the electronic circuit jumper and having two contacts respectively connected to the two contacts of the electronic circuit jumper and then mounting the electronic circuit jumper on the substrate.
